

Amanda Monteiro

FRONT-END DEVELOPER

CAREER OBJECTIVE

I am a web developer that strives to create a memorable user experience that is accessible for all. I am seeking a role that allows me to take initiative and practice finding creative solutions to problems before they even have a chance to arise.

FEATURED PROJECTS

I Dream of Cleannie | React, Firebase, Sass

A react based app that allows users to enter cleaning tasks for different rooms in their homes. Users can mark each task as complete or delete the task. Users can also click a button to generate a random suggested task based on the room. Data is saved in Firebase.

A Moment of Calm | jQuery, Sass

An app that utilizes jQuery to allow users to select a background image, an audio file to play, and set a timer. Alternatively, users can select a random image, audio, or timer value. An animation will start if the user chooses to have a visualizer accompany the timer.
