FEATURED PROJECTS

I Dream of Cleannie | React, Firebase, Sass

An app that allows users to enter cleaning tasks for different rooms in their homes. Users can mark each task as complete or delete the task. Users can also click a button to generate a random suggested task based on the room.

A Moment of Calm | jQuery, Sass

An app that allows users to select a background image, an audio file to play, and set a timer, or have one randomly chosen. An animation will play if the user chooses to have a visualizer accompany the timer.

Meme in a Giffy | React, Firebase, Rest API, Sass

Agency style group project where users can create memes by searching for gifs with the Giphy API and adding text to it. Memes are saved through Firebase and users can search through memes already created by using keywords. Users can upvote or downvote memes.

WORK EXPERIENCE

Health Surveillance Screener

University Health Network | Jul 2020– Oct 2020

- Used knowledge of hospital guidelines to direct patient flow in the hospital resulting in mitigating the spread of Covid-19
- Responded to queries and concerns in a professional, respectful, and courteous manner, resulting in a more positive visitor experience
- Collaborated with the shift coordinator to maximize the efficiency in screening areas resulting in shorter wait times

Office Administrator

Orthogenic Laboratories Inc. | Nov 2015 - Mar 2020

- Effectively handled accounts payable using QuickBooks Pro and Xero, ensuring bills were paid on time
- Successfully assisted clients through phone calls, e-mail correspondence, and FreshDesk which improved overall customer satisfaction
- Meticulously created and updated records and databases with sensitive client, financial and other data ensuring records were always accurate and up to date
